

Our commitment to ESG

[Text on screen] We're acting now on ESG. Our future relies on it. We aim to provide USD750 billion to USD1 trillion of financing and investment by 2030 to help our customers cut their carbon emissions.

Our innovations are making digital banking accessible with 1 billion logins to our personal banking apps last year. We're champions for inclusion across our bank, across the world. And helping our people with skills for the future, providing 5.2 million hours of training in 2020.
